Executive Summary

This capstone project builds a full-stack Mutual Fund Analytics Platform for Bluestock Fintech using real AMFI India data across 40 mutual fund schemes, 46,000+ daily NAV records, and 32,778 investor transactions.

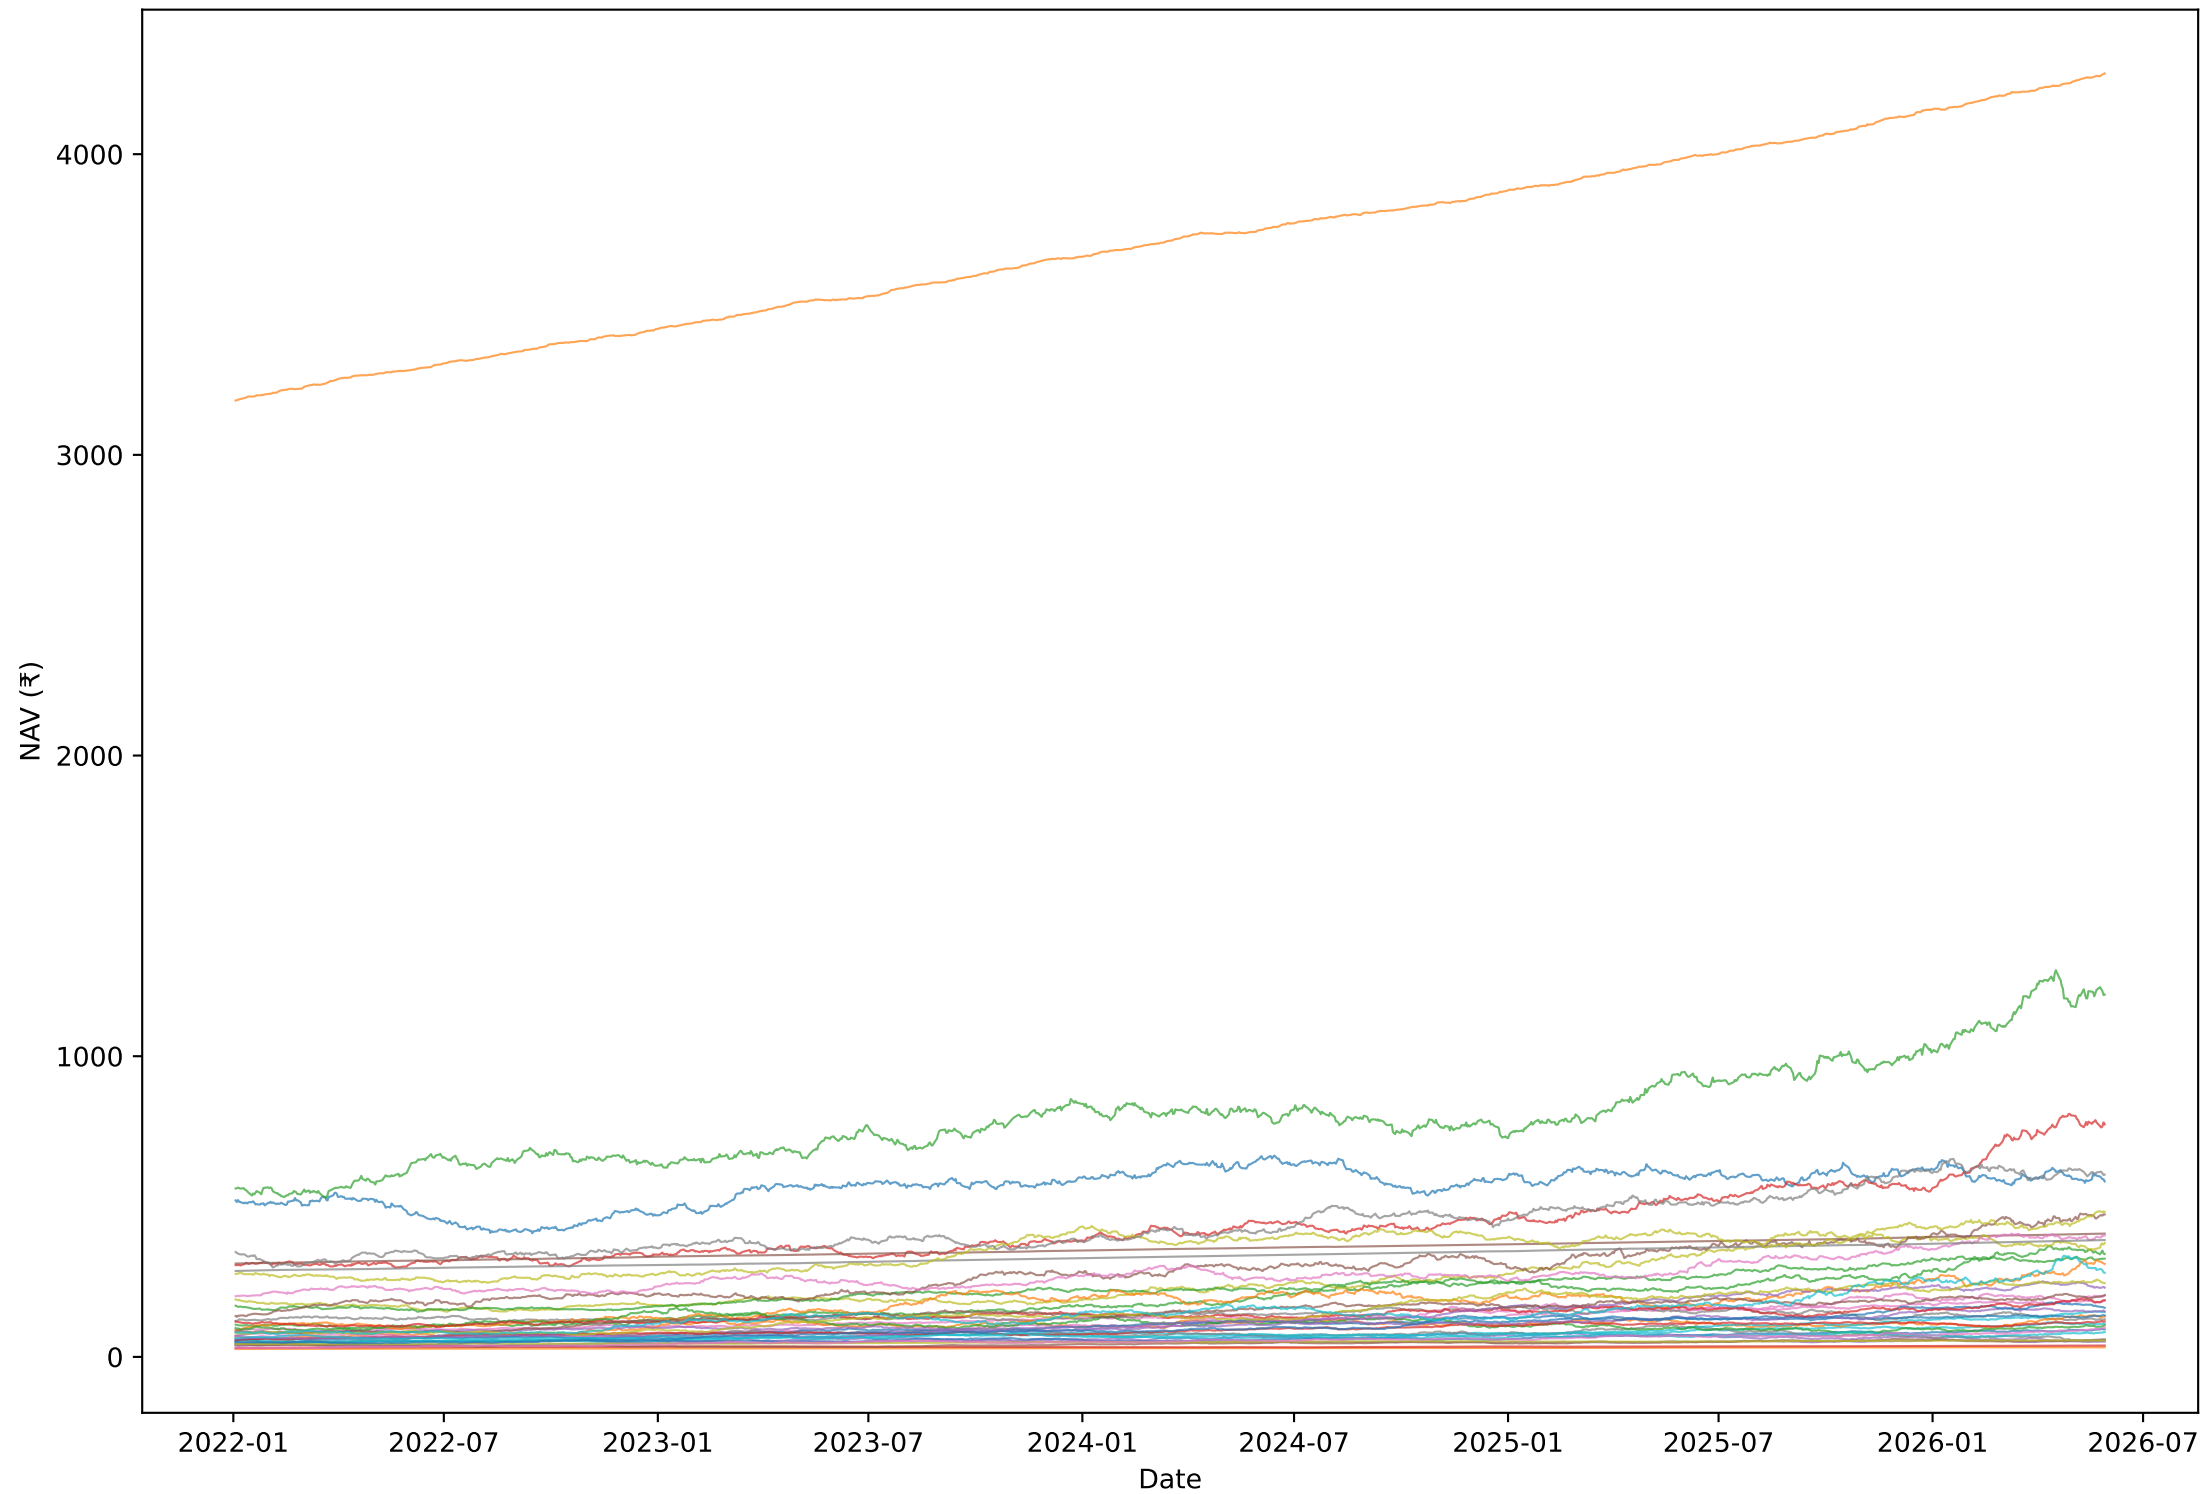

KEY ACHIEVEMENTS:

Built automated ETL pipeline ingesting data from AMFI + mfapi.in
Designed 5-table SQLite star schema with 12 indexed tables
Performed EDA with 16+ publication-quality charts
Computed Sharpe, Sortino, Alpha, Beta, VaR, Max Drawdown for 40 funds
Built composite fund scorecard ranking all 40 schemes
Developed 4-page interactive Power BI dashboard
Implemented fund recommender system by risk appetite
Analysed 5,000 investor cohorts across 12 Indian states

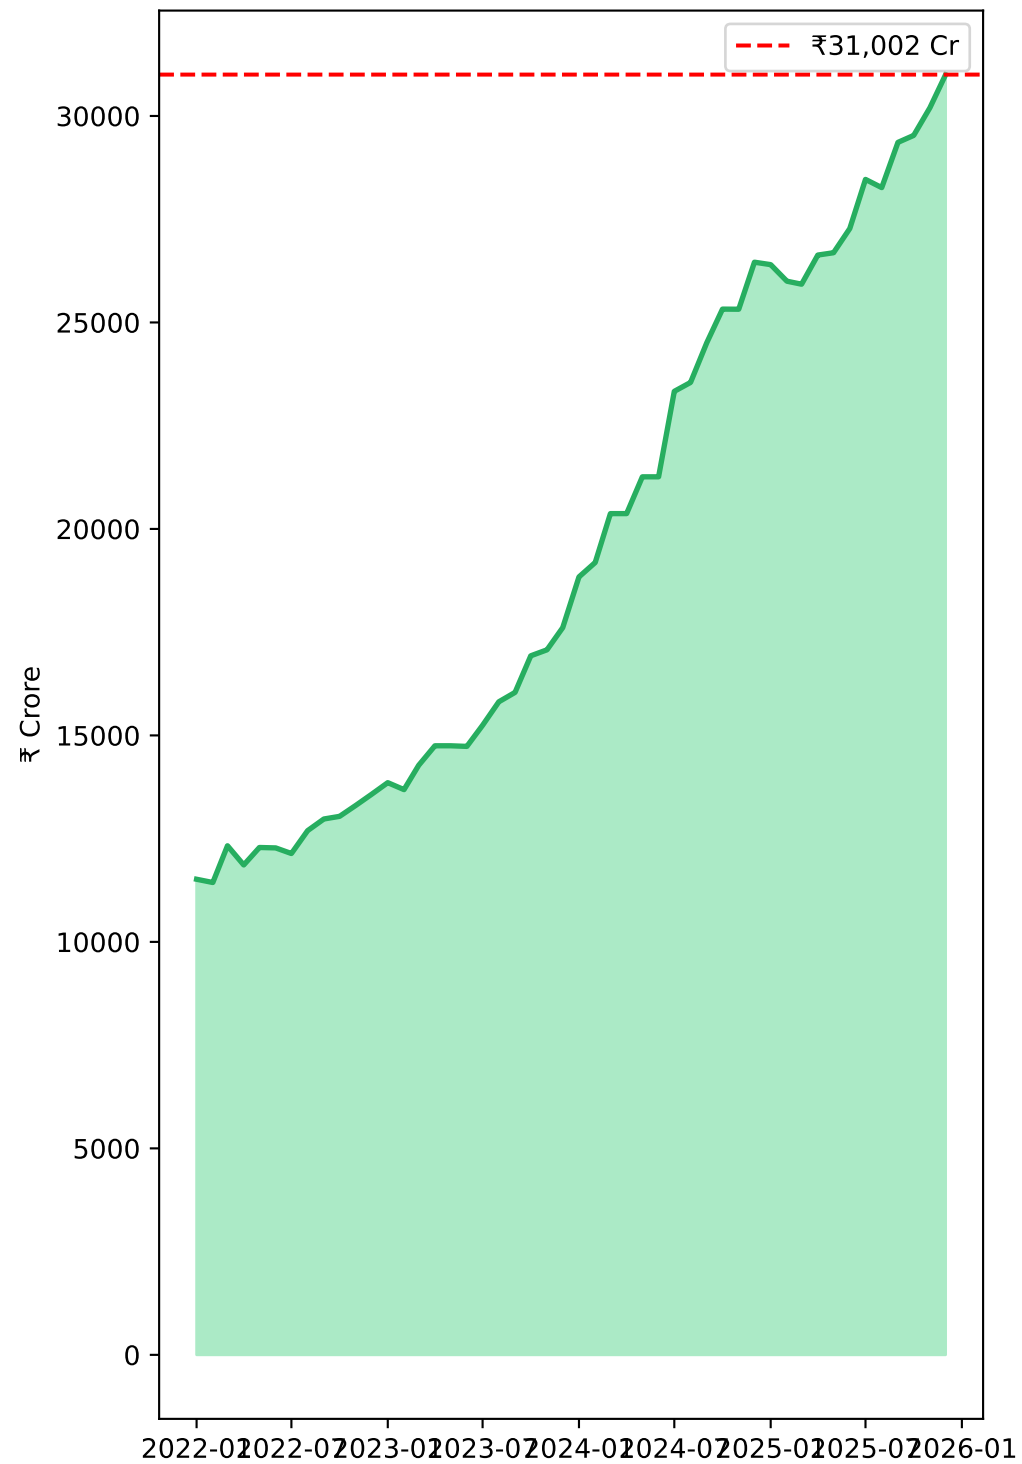

KEY FINDINGS:

- SIP inflows hit all-time high ₹31,002 Cr (Dec 2025)
- Industry AUM: ₹81 Lakh Crore | SBI leads at ₹12.5L Cr
- Folios doubled: 13.26 Cr (Jan 2022) → 26.12 Cr (Dec 2025)
- Mid Cap funds delivered best risk-adjusted returns (3Y)
- 26-35 age group drives highest SIP volumes
- T30 cities: 65% transactions | B30 growing 2.5x faster

Conclusions & Recommendations

CONCLUSIONS:

1. MARKET GROWTH

The Indian MF industry shows strong structural growth with folios doubling in 4 years and SIP becoming the dominant investment mode.

2. FUND PERFORMANCE

Mid-cap and small-cap funds delivered superior 3-year alpha vs benchmark, though with higher volatility and drawdown risk.

3. INVESTOR BEHAVIOUR

SIP dominates at 68% of transactions. The 26-35 age group is the fastest growing segment. B30 cities growing 2.5x faster than T30.

4. RISK METRICS

Funds with Sharpe > 1.0 represent consistent risk-adjusted outperformance. Max drawdowns between -13% to -35% across funds.

RECOMMENDATIONS:

- For Conservative investors : CRISIL Liquid / Gilt funds
- For Moderate investors : Large Cap Direct plan funds
- For Aggressive investors : Mid Cap / Small Cap funds
- For Tax saving : ELSS funds (3-year lock-in)
- For SIP automation : Mandate-based payment mode

LIMITATIONS:

- Investor transaction data is synthetically generated
- Portfolio holdings are as of Dec 2025 snapshot only
- Past performance does not guarantee future returns
